DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to spatial processing (e.g., patterns or subpixel configuration), classified in class 345, subclass 694.
 - II. Claim 13, drawn to waveform generator coupled to display elements, classified in class 345, subclass 208.
 - III. Claim 14, draw to computer graphic dithering processing, classified in class 345, subclass 596.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, for example the inventions, has separate utility such as the addressing means of pixel of group I does not drive the first sub-frame and second sub-frame as recited in group II, does not process the at least two bits of dither as recited in group III. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and III, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2674

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
